Sustainable

Cost effective – less trades

Strong, durable and solid

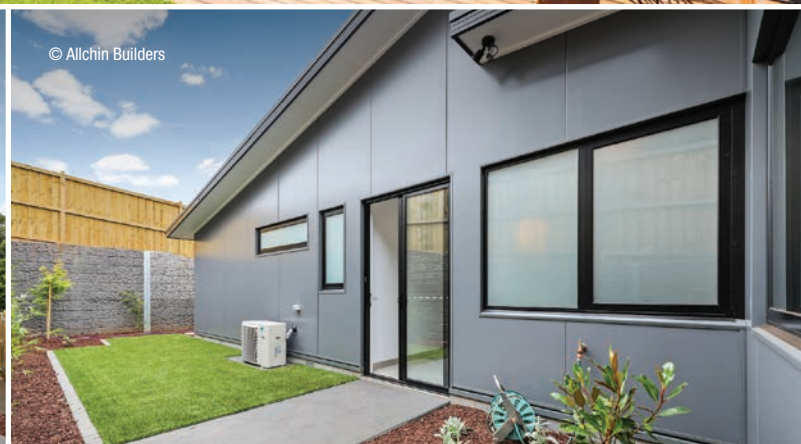

Luxury Living, Enriching Your Lifestyle

LuxeWall® represents the pinnacle of sophistication and functionality in a wall cladding solution. Crafted as a contemporary, lightweight insulated panel solution for residential and commercial applications. LuxeWall® redefines the concept of luxury living, meticulously crafted with a concealed fixing system designed for secure attachment to both timber and metal stud wall frames. LuxeWall® offers unparalleled combination of elegance, energy efficiency and durability.

This innovative system utilises a COLORBOND® steel face with an EPS-FR insulative core, which is elegantly concealed and orientated vertically for a sleek finish. The LuxeWall® colour palette includes a range of trending architectural Matte & Metallic finishes and is available in different profiles to achieve your design aspirations.

Core Thickness	50mm & 75mm
Core Type	EPS-FR with CorePlus®
Panel Width	900* and 1200mm
Panel Length	Up to 6.5m
Bushfire Attack Level	BAL 40 (all exposed core to be covered with flashing)

Note: *minimum order required

Elevate Your Walls: Where Safety Meets Style

Discover LuxeWall FlameGuard®, an exceptional fire-rated architectural wall cladding and boundary wall system crafted with a Non-Combustible Mineral Wool core for unparalleled safety and performance. LuxeWall FlameGuard® achieves up to a 60-minute fire rating (FRL 60/60/60), making it the perfect choice for residential application offering superior fire protection to zero lot line houses, knockdown-rebuilds and renovations situated on property boundary lines. LuxeWall FlameGuard®, ensures compliance with stringent fire safety regulations, even in scenarios where access to the exterior side of the building is limited.

LuxeWall FlameGuard® isn't just limited to residential use. It's also suitable for multi-residential and commercial application that demand a higher level of fire resistance, achieving up to an impressive 90-minute fire rating (FRL 90/90/90).

Engineered to simplify installation, LuxeWall FlameGuard® boasts a lightweight design, concealed fixing system and architecturally refined finish. It's the ultimate solution for properties with challenging site access, ensuring seamless integration and superior protection against fire hazards. LuxeWall FlameGuard® is CodeMark™ certified and can be trusted to safeguard your property whether for residential, commercial or boundary walling applications.
