

metseam®

Redefining Architectural Elegance

Introducing MetSeam®, an architectural decorative fin designed to transform façades with a striking aesthetic appeal.

Bondor Metecno's latest innovation seamlessly blends form and function, delivering a sleek, linear appearance enhanced by a concealed fixing system—perfectly suited for Bondor Metecno's architectural insulated panels.

The slender, tall ribs of MetSeam® create a dramatic interplay of light and shadow, bringing dynamic visual interest to luxury residences, modern office spaces, and commercial buildings. Its versatility invites creativity, allowing architects and designers to achieve unique, sophisticated exterior.

Key Features:

Sleek Architectural Aesthetic:
The slender fin design enhances contemporary façade styles.

Dynamic Light Interaction:
Creates a striking visual effect as sunlight moves across the surface.

Seamless Integration:
Works effortlessly with MetecnoInspire®, Equitilt® and LuxeWall® products.

Cost-Effective Alternative:
A stylish and economical solution compared to traditional standing seam cladding.

Efficient Installation:
Concealed fixing system ensures a clean, uninterrupted façade while simplifying installation.
